-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-7 are indefinite as to the use of "substantially chlorine free" as it is not clear what is encompassed by this phrase.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams et al (US 2,857,280) and King Arthur Flour.

Williams et al disclose the conventional production a sourdough pancake batter (see entire document). Williams et al disclose the production of a sponge, storage of the sponge (at 15-45°C), remixing, and the addition sugar, eggs, salt, and baking soda (see flow diagram, column 3, lines 14-39), and claims 1-7). Williams discloses the storage of the product during processing, wherein the sponge is stored and the batter is frozen prior to use.

King Arthur discloses the conventional production of sourdough waffles (see entire document). King Arthur discloses the production of a sponge, storage of the

sponge, remixing, and the addition sugar, eggs, salt, and baking soda. King Arthur also discloses the feeding of the starter, which includes storage at different temperatures (e.g. room and refrigerator).

Applicant's claims differ as to the specific recitation of multiple storage steps.

In the absence of a showing to the contrary, the stopping and starting of a process is no more than within the skill of the art. It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to store the sponge of either Williams et al or King Arthur and further process at a later time. It is further noted that the manipulation of the sponge is merely a matter of flavor choice and convenience, wherein it is well-within the skill of the art to modify a conventional recipe. It is further noted that the remixing and storage of the sponge is seen as no more than maintenance of the starter.
